

On 8 April 2020 the **Court of Justice of the European Union** has ordered to suspend the respective national legal provisions on the powers of the **Disciplinary Chamber** of the Supreme Court of Poland. Beyond any doubt this order is clear concerning its scope and meaning, it is executable and in any case it is binding.

**Court decisions must be followed.** Furthermore, this order of a court concerns fundamental issues of a national justice system, i.e. the **question of the independence** of a judiciary and thus the rule of law in one of the member States of the EU. Even more the organs of this EU member State should be aware of the consequences when ignoring such an order.

**The Disciplinary Chamber of the Supreme Court of Poland** is not independent and it **must not continue its activities** for the time being.

Despite these facts this **Disciplinary Chamber has decided to lift the immunity of Judge Beata Morawiec in a yesterday's decision** in order to enable criminal proceedings against this judge. Furthermore it has decided to **suspend judge Morawiec with reduction of salary of 50%**.

It is crystal clear that these activities of the Disciplinary Chamber fall under the scope of the order of the Court of Justice of the European Union. Thus **organs of the Polish State have ignored the binding decision of the Court of Justice of the European Union.**
